2018 QUICK TAX GUIDE

The required minimum distribution (RMD) for any year is calculated as the December 31 value of the prior year (plus the actuarial present value of any additional benefit provided within the annuity contract) divided by the RMD factor from the appropriate table.

Uniform Lifetime Table³

For use by:

- Unmarried IRA owners
 - Married IRA owners whose spouses are not more than 10 years younger
 - Married IRA owners whose spouses are not the sole beneficiaries of their IRAs
- (For married IRA owners whose spouses are more than 10 years younger, use Joint Life Table from Treas. Reg. 1.401(a)(9)-9, Q&A 3)

Single Life Expectancy Table⁴

Spouse beneficiary

IRA owner dies on/after Required Beginning Date (RBD): Beginning in the year following the year of the IRA owner's death, recalculate spouse beneficiary's single life expectancy each year while spouse beneficiary survives, using spouse beneficiary's age on birthday in that calendar year. If RMD would be less, spouse beneficiary would use IRA owner's term certain life expectancy. For that, use IRA owner's age attained on the birthday in the calendar year of IRA owner's death. Reduced by one for each passing year. (Note: Spouse beneficiary could instead roll over at IRA owner's death). **Death before RBD:** Same options as above, minus using IRA owner's term certain life expectancy, plus spouse beneficiary can delay until IRA owner would have turned age 70½, or spouse can defer all distributions as long as all funds are distributed in five years.

Nonspouse beneficiary

Death on/after RBD: Beneficiary uses beneficiary's own term certain life expectancy. For that, use the beneficiary's age attained on the birthday in the calendar year after the calendar year of IRA owner's death. Reduce by one for each passing year. If RMD would be less, beneficiary would use IRA owner's term certain life expectancy. For that, use IRA owner's attained age in the calendar year of IRA owner's death. Reduce by one for each passing year.

Death before RBD: Same options as above, minus using IRA owner's term certain life expectancy, or beneficiary can defer all distributions as long as all funds are distributed in five years.

No designated beneficiary

Death on/after RBD: Inheritor uses IRA owner's term certain life expectancy. For that, use IRA owner's age attained on the birthday in the calendar year of owner's death. Reduce by one for each passing year. **Death before RBD:** Distribute all within five years.
